

HELLO, I'm **Kyle Salmon**, *Staff Software Engineer* based in *Seattle, WA*. Full-stack developer and lover of good design

EDUCATION

COMPUTER SCIENCE & DESIGN

BACHELOR of ARTS & SCIENCE
York College of Pennsylvania
2009-2014

SKILLS

PRACTICAL Scrum Leader • User Experience Design • Developer First Build

TECHNICAL Typescript • Ruby (Ruby on Rails) • AWS Cloud • Docker • Node.js • React.js • Google Cloud • SQL & NoSql

EXPERIENCE

2021-present

Lead Developer RIZE • Washington, D.C.

Working in the Fintech space building applications and tools for client developers to onboard. Maintained and architected several different tools and services.

- ✱ Architected the company's first microservices using cloud infrastructure (lambda, dynamo DB) and build a boilerplate for easy spin-up of future products.
- ✱ Build and maintain a developer tool kit for our client's devs to use for easy technical implementation. Included an SDK wrapper in Node with Typescript support and a CLI tool that could spin up a Backing API in minutes.
- ✱ Created a Prototype banking application in ReactNative (expo) to test and demo things like Brokerage accounts, trades between DDA and external accounts, and virtual card functionality.

2020-2021

Senior Software Engineer INSPIRE CLEAN ENERGY • PHILADELPHIA, PA

Built top-of-mind products and web apps for a cleantech platform to better allow customers to signup to support renewable energy. Shell acquired Inspire during.

- ✱ Built web funnels that would take in a customer's location and give a flat month energy price right on the spot.
- ✱ Was the lead engineer on the company's first Growth Team. Responsible for identifying issues in the company and tackling them with tech.

2014-2020

Founding Engineer BRICKWORK • NEW YORK CITY, NY

First boots for an ecommerce SaaS platform, wore many hats over the years.

Worked directly with clients like Nike, Urban Outfitters, and other high-end retailers to better their in-store sale conversions before acquired by b8ta in 2019.

- ✱ Responsible for designing and programming RESTful API endpoints using Ruby on Rails and Swagger for documentation.
- ✱ Worked with Product and several other developers to architect and develop a Whitelabel product build using React.js.
