K

HELLO, I'm **Kyle Salmon**, *Staff Software Engineer* based in *Seattle, WA*. Full-stack developer and lover of good design

EDUCATION

COMPUTER SCIENCE & DESIGN
BACHELOR *of* ARTS & SCIENCE
York College of Pennsylvania
2009–2014

SKILLS

PRACTICAL Scrum Leader • User Experience Design • Developer First Build

TECHNICAL Typescript • Ruby (Ruby on Rails) • AWS Cloud • Docker • Node.js • React.js • Google Cloud • SQL & NoSql

EXPERIENCE

2021-present

Lead Developer RIZE • Washington, D.C.
Working in Fintech building applications and tools for client developers to onboard. Maintained and architected several different tools and services.
✻ Architected the company's first microservices using cloud infrastructure (lambda, dynamo DB) and built a boilerplate for easy spin-up of future products.
✻ Build and maintain a developer tool kit for our client's devs to use for easy technical implementation. Included an SDK wrapper in Node with Typescript support and a CLI tool that could spin up a Backing API in minutes.
✻ Created a Prototype banking application in ReactNative (expo) to test and demo things like Brokerage accounts, trades between DDA and external accounts, and virtual card functionality.

2020–2021

Senior Software Engineer INSPIRE CLEAN ENERGY • PHILADELPHIA, PA
Built high priority products and web applications for a cleantech platform that customer's can use to support renewable energy. Shell acquired Inspire in 2020.
✻ Built web funnels that produce a flat monthly energy rate based on the customer's location.
✻ Lead engineer on the company's first Growth Team. Responsible for identifying issues in the company and tackling them with software.

2014–2020

Founding Engineer BRICKWORK • NEW YORK CITY, NY
Helped build the ground work for an ecommerce SaaS platform. Worked directly with clients such as Nike, Urban Outfitters, and other high-end retailers to better their in-store sale conversions.
✻ Responsible for designing and programming RESTful API endpoints using Ruby on Rails and Swagger for documentation.
✻ Worked with Product and several other developers to architect and develop a Whitelabel product build using React.js.
✻ Company was acquired by b8ta in 2019.
